

Web Enhanced Courses – A non-print note should be created to document the level of technology and specify the percentage of class time. For example, one class may be taught entirely online and a room is not needed. When this is the case enter a non-print note (go cn) and then enter the building as “WEB” and the room as “ONLINE” in the section update screen (go se). If there is only a small portion of the class, then only a non-print note is necessary.
